

STUDIES OF BIRDREACTIONS, CAUSED WHEN
EXPOSED TO LASER LIGHT

L. STAHL & S. JOHANSSON

ABSTRACT

The presentation will be composed by the following points:

1. The birds sense of sight and range of sight
2. Pilot's possibilities to use light in order to avoid birdstrike
3. Disadvantage of ordinary taxi- and landinglight
4. Advantage of laser-light
5. Studies of birdreactions, caused when exposed to laser-light
6. Modified methods for future experiments
7. Technical facts
